Sentiment

Words are scored based on their subjective meaning. "Positive" words range on a positive scale; "Negative" words range on a negative scale. Trajectory's Analytics Engine computes the book's sentiment curve across sentence, paragraph, chapter and entire book. This sentiment "fingerprint" at an aggregate level yields a unique picture of the book.

Intensity

Words are scored based on their subjective meaning. Both "Positive" and "Negative" words range on a positive scale. Trajectory's Analytics Engine computes the book's intensity curve across sentence, paragraph, chapter and entire book. This intensity "fingerprint" at an aggregate level yields a unique picture of the book and portrays overall levels throughout the book independent of the negative or positive nature of the action.
